Nevada City Nugget

VOLUME IV, NUMBER 48 THE GOLD CENTER NEVADA CITY, NEVADA COUNTY, CALIFORNIA. THE COUNTY SEAT PAPER NOVEMBER 14, 1930

MINING ENGINEER SAILS FOR FOREIGN PARTS

CAMPTONVILLE, Nov. 11. — (Special to The Nugget.)— Louis J. Joubert, eminent mining engineer, native of this place, sailed November 13th on the S. S. Ventura for New Guinea for a year's absense. He goes to that country as the representative of Placer Development Limited, whose head offices are in Vancouver.

Mr. Joubert will have charge of the work on the company's gravel deposits doing the development work and putting the property in shape for operation.

The journey from here to the mine in New Guinea will take six weeks and the latter part of it from Australia to his destination will have to be made by aroplane. This is his second trip to that country.

Joubert is one of the most eminent mining engineers in the country, having spent many years of his life working on big enterprises in foreign lands, having spent long periods in the worst jungles of the tropical parts of South America and risked his life in following his chosen profession. His son, James, resides Oak Valley and attends the local high school

OLD TIME PROSPECTOR FOUND DEAD IN CABIN

The body of Jack Hughes, desert hermit and old-time prospector was found dead in his lonely cabin four miles from Downeyville. He had been dead about a week. He had prospected in the lonely regions of the Lodi Tanks for many years.

PURCHASES MINES AT MOHAVE CALIFORNIA

The Roydon Mining Company, a Nevada organization, has taken over the Elephant, Gray Eagle and Echo properties, comprising twelve claims, and will operate under the leasing system. Lyttleton Price, one of the three mining engineers who took a fortune from the Engineers lease on the Florence mine at Goldfield, is in charge of the property and will have charge of all operations.

The Roydon company have acquired the lease held by Ben Hickman, formerly of Randsburg and Nevada City districts, who started exploratory work in July, 1928. Hickman did 1400 feet of work, driving tunnels and drifts in unexplored ground and has opened ore in a number ot veins some of which are from six to fifteen feet wide that will average around $10 a ton in gold.

A new crusher has been ordered for the mill and the plant is expected to be ready to run by the middle of this month. In the meantime a force of miners are engaged in preparing for the extraction of ore.

The company will lease ground to practical miners where ore of good grade is exposed in veins 30 inches in width. Air will be supplied for power drills and the blacksmith shop is equipped with drill sharpeners and other necessary machinery and tools. The company will also accept custom ore for treating whih will be helpful to small mine owners an dthe entire district.

Operation of the Roydon company under eyperienced and capable management is expected to stimulate mining and leasing in the Mohave district, which has been neglected in late years.

ARE WELL PLEASED WITH WITH TWIN SISTERS

Mr. and Mrs. Oresta Rosa and Mr. and Mrs. Romeo Cerri, residing at Heldsburg, California, were weekend visitors in this city last week. They are interested financially in the Twin Sisters mine and were here for the purpose of looking over the property and returned to their homes more than pleased with the showing now being made at the property.. The visitors were highly delighted with the progress being made in the installation of new machinery and the general outlook for a successful run this coming winter.

RUSHING WORK ON ROAD TO BARIUM MINE

The work of building a wagon road from Castella to the California Zinc company's barium mine seven miles east is progressing rapidly under the direction of E. L. Ralston, general manager of the company. The road is completed as far as the crest of the hill and it is hoped to complete it as far as the mine before snow sets in to any great extent.

The road is being built so trucks can haul the ore from the mine to Castella for shipment by train to the paint works of the company.

RICH ORE FOUND IN MISTLETOE MINE

The Mistletoe group of claims, one mile above Clearinghouse in Mariposa county owned by Warford, Caton, Egenhoff and Hansen and recently leased to L. J. Rowland is said to be making a splendid showing under development. Recently a fine vein of ore has been encountered which shows large spers of free gold and assays very high. Three men are employed in driving the tunnel into the mountain where ,upon the surface, much high grade ore has been found in past years. The tunnel was in only 30 feet when the rich ore was discovered.

RED CROSS BROADCASTS TWO RADIO PROGRAMS

In preparation to the annual roll-call which began Tues.—Armistice Day, the American Red Cross gave two radio broadcasts. The first was a skit entiled "The Red Cross Comes Home to the Fishers," and was sent out over the Columbia Broadcasing system in the afternoon. This was heard over KOL, Seattle, and KFPY Spokane. Also KDYL, Salt Lake City.

From 4:45 to 5 p. m., Pacific time John Barton Payne, national chairman of the Red Cross spoke from Washington. This was heard over KGO, and a number of other western stations.

MINE BLAST COST FIXED AT $750 000

The total amount of indemnity on account of the Millfield, Ohio coal mine explosion Wednesday of last week has been estimated at $750,000 Seventy nine persons were killed and twenty injured and the Industrial Commission has estimated the total amount to be paid by the state at $750,000.

The Commission started at once to pay off the death awards.

Under the compensation law the state will pay the maximum death award of $6,500 to the family of each person killed which will cost $513,000. In addition, the cost of the funerals of each victim is also paid by the state.

MRS. E. LEITER NAMED WORTHY MATRON O. E. S.

Mrs.Elizabeth Leiter, at the last meeting of Evangeline Chapter, No. 9, O. E. S., was elected to the position of Worthy Matron, and will preside over the destenies of the chapter during the coming year.

Other officers elected were, Joseph F. Stenger, Worthy Patron; Mrs. Elizabeth Coughlan, Associate Matron; Lloyd Jennings, Associate Patron; Miss Alice E. Cooper, Secretary; Mrs. Katie Hall, Treasurer; Mrs. Mary German, Conductress; Mrs. Lydia Gleason, Associate Conductres.

T. EDGAR BREE BECOMES DISTRICT MANAGER

T. Edgar Bree, formerly a resident of Nevada county but more recently a resident of Berkeley for the past few years where he was employed by the General Petroleum Corporation has been transferred to Auburn as district manager for Nevada and Place rcounties, a position he formerly held with the Standard Oil Company of California.

Bree's new district includes the distribution of G. P. products in Lincoln, Roseville, Auburn Grass Valley, Colfax and Nevada City.

ANOTHER LONG DORMANT MINE COMING TO LIFE ONCE MORE

The Columbo Mines Soon to be Opened by Thomas Campbell Well Known Mining Operator from Seattle —Property has Fine Record

The unfailing faith of the late Frank Cook, one of the owners of the Columbo (Bullion) group of mines, three and a half miles from Sierra City is about to be compensated in the opening up of the property by Thomas Campbell, mining man of Seattle, who after an intensive investigation of mining conditions in various parts of the west believes the Sierra City district has the best prospects of any he has visited.

The group is owned by the heirs of Frank Cook, William and Dan Coughlan of Sierra City, and Mr. and Mrs. Heintzen of Marysville, all of whom succeeded to their interests in the property through inheritance by relationship to the former owners.

Arthur C. Hammond, of this city, son-in-law of Cook has carried on since the latter's death, and fruition of his faith in the property seems about to be realized.

The group consists of the original eight mineral locations which have been consolidated with the "Bondholder" group making a solid block of ground about 7,000 feet along the course of the Columbo vein system and 1800 feet in width.

The Columbo vein parallels the famous Sierra Buttes at a distance of about 2500 feet with the same dip and strike as that vein. It is carried in a formation of schist, commonly known as amphibolite intermingled with porphyry, quartz-porphyry and rhyolite-porphyry.

There has been considerable development operations on the property, which consist of open cuts on the surface and three tunnels, known as Nos. 1, 2 and 3. The No. 1 tunsel is 600 feet in length and 300 feet below the surface; No. 2 is 900 feet long to the same point. 180feet lower on the vein and No. 3 tunnel is 1400 feet long and 120 feet vertically under No. 1 tunnel.

There has been considerable stope work done on this vein through No. 1 tunnel both above and below the tunnel level. According to reports on file with the California State Division of Mines these stopes yielded $365,000.

The stopes on No. 2 tunnel caved in following the expiration of a lease held by the last operators and when operations were again undertaken the No. 3 tunnel was driven in an attempt to strike the vein 180 to 200 feet below the No. 2 tunnel, but the tunnel failed to accomplish the purpose.

Campbell and his associates plan to operate the No. 3 tunnel. All the cook house, office , bunk house, buildings consisting of warehouse black-smith shop, compressor house, are on the property. There is also a 32 horsepower Fairbanks gas envine, a Rand compressor, air drills, etc., sufficient for the present plan of operations.

Campbell believes the vein can be less than 100 feet from a cross-cut known as the No. 2 russ-cut.

It is believed that ore already blocked out between Nos. 1 and 2 tunnels will aggregate more than 30,000 tons. Assays of ore from the surface cuts run $4. per ton; above the No. 1 tunnel about $7. per ton and below No. 2 tunnel $12 per ton, and there are reports of ore running as high as $60 per ton at the level of the No. 2 tunnel.

The present bond holders are confident that the mine will develop into a producing property under their proposed plan of operations.

TRAGIC DEATH AND BURIAL OF SIMEON CUMMER TOLD

Some time ago, the Nugget received a request by mail to assist in locating the last resting place of an old time miner by the name of Simon Cummer who was supposed to have lived and died in this section of the state away back in the early '80's. Accordingly we published a request for any information as to the man's death or if still living, where he could be found. This week we received a reply to the inquiries from a gentleman now living in Oakland, whose name we withhold by request

Oakland, Calif., Nov. 10.

Editor Nevada City Nugget:

Dear Sir—

Quite recently a resident of Nevada City informed me of an article appearing in your paper, asking for information regarding one Simeon Cummer, who many years ago mined in the vicinity of Quaker Hill.

"Sim" Cummer, as he was known, in the years 1869-70, was in partnership with James Rose, who later became superintendent of the Bear River division of the then South Yuba Canal and Water Company, ran a700 foot bed rock tunnel to tap an old river channel in a mine at Murchie Gap, three miles above Quaker Hill; like most old time miners seeking ancient river channels, they found on reaching the channel they were too high to reach the bottom of it without considerable expense and so temporarily suspended operations with a view of seeking employment elsewhere to replenish their depleted pocket books, and again resume work where they had left off.

However, fate decreed that they were never again to stick a pick into the gravel of the old channel they sought so hard to find, but never bottomed.

In late 1871 Sim Cummer obtained employment with Jacobs and Sargent operating mines at Quaker Hill, and came to live with my family, my father being a miner for many years in the same mine with him.

On December 1, 1880, Sim Cummer and my father, in a furious snow storm left the "Big Tunnel" at the head of Deer Creek for our home at Hunt's Hill, where we then lived. The following day December 2nd Sim Cummer left alone, in a storm to return to the Big Tunnel an dhe reached the crest of Mount Oro, some eight miles from our home but he evidently had become exhausted, and perished in the deep snow. His body was found on or about the 16th of December, 1880 by his partner and boyhood companion, James Rose.

The body was lashed to four snow shoes and brought down to our home at Hunts Hill where an inquest and funeral services mere held; burial taking place about December 19, 1880 in the Nevada City cemetery, the records thereof will substantiate my statements.

Now, please let me add a bit of romanc e to my true story of the fate of that fine man, Sim Cummer, who like his partner, James Rose, was a Canadian of refined stock and both were remarkable men of the time. For 35 years I have owned this same mine, and dreamed on and on the dreams where Sim left off, of reachinf the channel bottom; sixty-one years have passed since Sim Cummer hewed and placed in this tunnel the timbers, long since decayed. At close to three-score-and-ten I am replacing with new, the old decayed timbers in happy anticipation of Sim's and my dreams coming true. Time will tell if I succeed, or if I, too, like Sim, perish from the earth and "never know."

Yours truly, L——. B——.

Oakland, California.

FIREMEN HAVE FEED

Nevada Hose Co. No. 1 enjoyed a weinie and sauerkraut feed at their meeting Wednesday evening. The committee had quite a spread, which will be the beginning of a number during the fall and winter months. The business session was devoted to discussion of matters pertaining to the department.

Ignition Parts and Accessories at Miner's Foundry. 24tf

PROMINENT MINING MEN VISIT NEVADA CITY DIST.

During the past two weeks many prominent mining men have visited this city looking over the district for promising properties with a view of purchase. Not a day passes but that from one to a half a dozen operators do not call at this office requesting information for this, that, and the other, as the case may be. Among those calling last Wednesday were Calvin Barkdull, consulting hydraulic and mining engineer of Seattle, Washington. Accompanying Mr Barkdull were Wm. Hall of Seattle and J. Wienach, owner of the famous Ellma mine in Alaska that has produced and shippedto the Tacoma Smelter more than eight million dollars in ore. These gentlemen have in view options on several local properties and left the last of the week announcing their intention to return shortly to prepare for operations on some of the properties which they have placed under bond.

MINE LOSS FEARED IN GAME SANCTUARY

The end of prospecting and of mining and a consequent blow to all mining interests in Mariposa county is feared by J. W. Warford, secretary of the Mariposa Mining Association, if plans now being considered by the Mariposa county conservation committee of the State Chamber of Commerce in meeting here this week are consummated. They aim to create a game sancutary Near the Yosemite Valley which will put a stop to all prospecting and work a great hardship to miners and mining.

MILL TO BE INSTALLED AT OLD JONES MINE

A 300-ton mill and other equipment will be installed at the old Jones mine, now being operated by the Gold Ridge mining Company near the once famous old gold camp J. J. Trimble.

He states that the ore is low grade and will be milled in large quantities as a steam shovel will be used to excavate down to a depth of sixty feet.

WILL TRY FOR GAS IN SHASTA VALLEY

A company has been formed and machinery purchased for sinking a gas well in the Shasta valley according to reports made by George King of the Montague community.

If the machinery arrives on time it should be on the ground within the next thirty days said Mr .King.

Some conjecture has been made by various men in that section as to just what gas development would do for that section. he said.

To say the least, every industrial development is a boost for the section and reflects its prosperity on every other near-by section.

Coal, oil and gas would all have been brought to light long before this in Shasta and Little Shasta if the right parties had had it in hand..

Just what this new company will do cannot be prophesied but it well known that gas in commercial quantities exist all through Shasta valleyand the Ager section as tests have shown as air is escaping in great quantities and wasting when it should be put to use.

The King ranch has been famous since the early days for its salt wells which in the early days supplied salt to all Northern California before the coming of the railroad, when salt could be shipped in cheaper than it could be evaporated from salt wells. These salt wells were operated for years by the escaping gas from near by and was quite sufficient for all needs. When the salt was no longer evaporated the gas went to waste.

STRUCK RICH GOLD POCKET LAZAR MINE NEAR SONORA

Recently a gold pocket was uncovered in the Lazar gold mine near Sonora owned, operated by Vucasovich & Company that was a marvel. The pocket has yielded around $15,000 and has not yet been exhausted.

INSTALLING NEW PLANT IN SALMON MT. MINE

John Nefroney, opening up property in the Salmon Mountain section according to the Yreka Journal is installing an entire new equipment and having splendid success in his operations.

Nefroney is putting in machinery to increase the use of power from 500 kilowatt units to 1200 kilowatt which is to be used for the driving of his own machinery in hydraulicing his placers located on the South Fork of the Russian River and that he is installing a 72 kilowatt unit for temporary use. Also he is installing a 90 ton per day Ecelston Tube mill and a clean-up barrel for the treatment of the high grade specimen ore, especially from the famous old Advance mine.

This ore constitutes about 200 tons of as high grade ore as has ever been known in the history of the Salmon river section.

It is said that Nefroy has a spendid outlook, in fact people who have visited the property state that it is the best in the Salmon Mountain district. There is in evidence what gives every appearance of a mammoth ore body that runs exceedingly rich and should be a good producer for years to come. The Salmon River section is one of the most promising in the west and is deserving of more than a passing notice.

Several mining men are checking up on different properties, some of whom hope to get things in shape for work before winter sets in.

A rich deposit recently uncovered in the Siskiyous by William Brandt at his mine on Sterling mountain appears to be one well worth the time that he has spent developing the property during the past three years. During the past three years Mr. Brandt has been persistently following what appeadel to be good leads only to have them finally pinch out on him but recently has been working in a fine vein of Telluride ore that is rich with free gold.

CITY TRUSTEES HOLD REGULAR SESSION

The Board of Nevada City trustees met in regular monthly session Thursday night and after allowing the various bills against the city, discussed in a general way several matters but took no definite action.

The following bills were found due and ordered paid:

General Fund

Ada Rich, salary as water collector, $85; L. W. Jennings, salary as city marshal, $125; Geo. H. Calanan, salary as clerk, $20; Emma M. Foley, salary as treasurer, $12.50; W. C. Jeffrey, salary as nightwatchman, $65; Dr. E. M. Roesner, salary as meat inspector, $25; Nevada Irrigation District, water, $218.60; Pacific Gas and Electric Co., lights, $243.62; Chamber of Commerce, allowance, $15; Pacific Telephone and Telegraph Co., rent of phone, $2.85; Bank of America of Calif. rent of safe deopsit box, $3; Plaza Grocery Store, cement, $3; Alpha Hdw. & Supply Co., supplies, $4.45; F. F. Breese, supplies and labor, $7.85; M. L. & D. Marsh Co., lumber, $8.64; Nevada City Nugget, printing, $11.75; Christenson Bros. sharpening tools, $12.30; S. S. Trevethick, hauling, $32.25; Standard Oil Co. of California, $46.17; Miners Foundry and Supply Co., labor, $108.66; Nick Sandow, labor, $108; Fred Eilerman, labor, $108; Henry Hurst, labor $47.; Jim Dillon, special officer, $4; J.F . Stenger, special officer, $4; F. T. Nilon, salary as city attorney, $100; Jas. Penrose supplies, $2.50; Carl Trevethick, hauling gravel, $35.35; State Compensation Ins. Fund, policy, $250.

Fire Fund

Herbert Hallett, salary as truck driver $103.; Pac. Gas and Electric Co., lights, $4.29; American La France Engine Co., supplies $7.21; Alpha Hardware and Supply Co. supplies $12; Nevada City Garage $2.35

ENGLISH TIN MINES CLOSE ACCOUNT OF LOW PRICES

After operating for more than 200 years the East Pool Tin Mine of Cornwall, England, has closed down owing to the low price of tin.

RETURN OF THE GOLDEN DAYS OF THE WEST

Not in many decades have conditions been so propitious as they now are for intensive prospecting and the development of gold mining properties—for the production of the yellow metal on an increasing scale. Commodity prices are low .Labor is abundant and highly efficient equipment is to be had at short notice and at a reasonable cost. Bank deposits have increased steadily notwithstanding the cry of hard times, indicating the availability of capital for investment of money at a low rate of interest. A shortage of gold now exists throughout the entire world according to economists, who see in this circumstance a restriction on commercial intercourse and one of the main reasons for the prevailing depression. Producers of gold are assured a world market for their output at a price that is fixed and that price will never be lower. Under competent engineering direction the operation of a proven gold mine offers possibilities for regular and steady returns on a reasonable investment, whether the prevailing economic conditions of industry be good or bad. Whether the world is spending or saving, at peace or at war, whethr labor fails to meet or exceeds demands, gold is needed. An overproduction of gold is not within the range of reasonable prediction.

The mining of good ore offers no difficult problem, be the deposit on the surface or under the ground. Metallurgical treatment is complicated only in rare instances. A marketable bullion, easily sold with negligible penalties can be produced by small tonnage or large tonnage operations. No excuse can be offered by the United States for its failure to increase gold production at a time when every factor is in favor of such increase. The ore is here. Right here in Nevada county the landscape is peppered all over with proven gold mines that have yielded millions in the past and if again opened up and properly worked will yield millions more. Within plain sight of this city are several idle mines of this class lying dormant, awaiting the advent of men and means to again become producers of wealth and scenes of activity. Capital for explostation and research and production is now available. Technical skill was never more eager to demonstrate its ability. Engineering is ready to take to the field and work miracles of economy in the production of power and in the handling of material.

Opportunity beckons to the entire metal-mining field to aid in counteracting the present depression in metals other than gold. If engineers are courageous, without being unprofessional, if buyers of prospects are fair and sellers are reasonable in their demands, a national movement to increase the production of gold, which would be of material help to all lines of industry, good times would soon be under way and the "slump" would soon vanish.

The United States is a land of immense low grade ore resources; but its gold-mining industry since the close of the World War has seemed to lag behind the development of the copper and other mineral industries. The yield of gold in 1928 was $46,165,000 but in 1929 it had dropped to $43,900,000.

This trend can and is being reversed dring the past few months. Which state, company or group of operators will be the first to record a material increase in production of gold—in that branch of the mining industry in which President Hoover served his apprenticeship—and which now offers opportunities for successful gold mining are far more favorable right now than they have been for a generation. Many old mines dot the west—mines that have been previously worked and which have yielded vast wealth—mines that have been proven and whose hidden wealth is well established—lying dormant awaiting the advent of men, money and muscle to put them again before the world as a producer and yielder of riches.

SHOW US?

Dr. Julius Klein, Assistant Secretary of Commerce and a well known economist, recently predicted that by the end of October general business conditions would be improved and that by the end of the year price levels should reach the 1928 standard.

—Well, maybee so! But as far as we are concerned, we'd rather see a little of this talked of prosperity than to hear so many prophecies regarding the bettering of conditions—however, we're neither a prophet nor a son of a prophet and don't know—but we do know that a "slam handwich" is a darn sight more satisfyin' than the promise of a job in the new Jerusalem.

By the time this issue of the Nugget goes to press, Germany in all probability will have repudiated her war debt—and that means that all the other nations will do the same—Ah well!—W'at's the odds? Our Uncle Samuel just loves to give money to anybody that don't happen to be an American. As Arthur Brisbane says—there's nothing romantic about an American.

England has run out of anything else to tax so she has put a tax on all bachelors—ah well—maybe the bachelors are better off at that.

THE HIGH SCHOOL NEWS

Edited Weekly by the Students Nevada City High School.

On Thursday, November 20, afternoon and evening, the Senior English class of the Nevada City High School will put on three one-act plays assisted by Girls Chorus and Boys Glee Club at the Nevada Theatre of Nevada City under the direction of Miss Annie R. Gray. The proceeds of the plays will go toward paying for "The Quill," the Senior Annual.

The three plays to be produced are, "Trifles," a poignant drama by Susan Glaspell. "The Exchange", a mirth provoking play by Alton Thurston; and "Thursday Evening" by the inimitable Christopher Morley. The plays are a riot of fun even though they are real literature. The children who come to the matinee will have more fun than any "movie". Thursday matinee 25c evening 50c.

Come and see Tom Hogan as a young benedict chastise his spouse for waste and rescue "perfectly good food" from the garbage can;

See Gertrude Marriott the newly-wed hold her own in self-defense and see the mother's-in-law rescue the young couple from dangerous consequences at their first quarrel.

Come and see Calvin Fisher as judge, dealing out "new wives for old "only to make people realize that the old ones were the best after all.

See Hudson Gray exchange poverty for indigestion only to ask for the poverty back again.

See Ruth Noyes exchanging her wrinkles for deafness only to regret the exchange later.

See Carl Murchie as a dairyman—kicked and bespattered.

Freshman-Junior Game

A championship game was played between the Juniors and Freshman teams Friday.

The Freshmen were victorious by a 10-4 count. The Freshmen team outplayed the Juniors all through the game. At the end of the first inning the score was 40. Gleason and Nagle were the Juniors battery while Pellegrini and Godfrey did the work for the Freshmen. The whole school witnessed the game and were very enthusiastic.

G. V.-N. C. Football

Friday the N. C. H. S. Football team played a game of football on the Grass Valley gridiron. The teams played a scoreless tie for three quarters but in the fourth quarter a series of luck brought the ball to the 5 yard line and an end run brought the ball over for a score

Armistice Day

The Junior's Armistice Day Program was held Monday, the 10th. Caswell Fischer acted as chairman. He gave a talk on the causes of the world war and its effect on different countries.

Betty Bettles recited the poem, "I Have a Rendezvous With Death" by Allan Seegar.

Barbara McMinn recited "The Soldier" by Rupert Brook.

The Junior boys and girls sang some popular songs.

James Davis gave a talk on Peace.

Mr. Bennetts of the American Legion gave an excellent talk on his personal experiences during the world war.

CALIFORNIA 50 YEARS AGO

The following items, culled from "The Bear" may not be news, but they are deciedly interesting and we take pleasure in their reproduction.

John Campbell lost his life in a fire which destroyed his San Francisco dwelling November 21.

The Napa City home of Charles Boehringer burned November 22 and two small children, left alone in the house, were cremated.

The Sacramento music store of John F. Cooper, burned November 14, causing a $20,000 loss.

Forty houses in the mining town of Jamison, Plumas county, burned November 19 with a loss of $70,000.

Frances Lopez, champion horse thief of the state, was captured in Ventura county November 20. With him were twelve horses stolen in Northern counties.

Two young men, arrested in Santa Clara county for cattle rustling, had to be discharged when brought to against them charged the commission of "grand larceny" which was an unknown offense.

(Fifty years ago it was not a crime to steal cattle unless the cattle had been used as oxen, in which case it was the same as horse stealing.)

Chas A. Spear published at Stockton, San Joaquin county, a book entiled "Retailer's Protective Union Reference," giving the names of a great many citizens as good, bad and indifferent pay. He was arrested for criminal libel but placed the blame on another and finally wiggled out and was acquitted.

The largest octopus ever seen in San Francisco was captured by an Italian fisherman near the Faralone Islands November 25th. It measured 12 feet from tip to tip of its tentacles.

A school of whales entered Monterey Bay November 3. In great excitement whalers started to harpoon them but succeeded in capturing only one of the big fish.

A brilliant meteor passe dover the town of Oakland on November 28 and exploded south of that city. The roar of the explosion was heard all over Alameda county.

Seven-year-old Nellie Newell of San Jose, Santa Clara county, found a discarded shot gun November 16. Attempting to lift it from a box it exploded and she was instantly killed.

John Peterson, a Lincoln county farmer was fatally burned while engaged in clearing stubble from his ranch home.

Jim Holland, a placer miner in Nevada county quit work and walked over to put on his coat. He jusped back in terror as he saw coiled up and ready to strike a huge rattle snake. Stooping down, he grabbed the first rock in sight and killed the snake. Wondering at th eheift of the rock, he walked over and picked it up a second time and was more surprised than ever to discoved he had killed the snake with a chunk of pure gold; a nugget which he sold a few days later for $260. On the strenghth of his find he sold his claim a few days later for a large sum.

Hiram Bolton, a cowboy on the ranch of Colonel Hollister in Santa Barbara county, lassoed a bronco on November 14 and attempted to hold it by circling a small oak tree with several laps of the rope. The cavorting mustang pulled the tree out by the roots and falling upon Bolton fatally injured him.

Rev. Packard, a Stockton, San Joaquin minister was thrown from his buggy November 28 and killed.

Al Courtright, a notorious sporting man who had been in numerous shooting affrays, decided to have a showdown with George Devilbliss in Mendocino county. The latter, however saw Courtright coming and getting in the first shot, killed him.

SUPERIOR COURT

Wednesday of last week was the regular law and motion day in the Superior Court and the following matters have been set down for hearing before Judge Raglan Tuttle

King vs. McKelvy— setting case for trial

Estate Archibald Nivens and John Arbogast, deceased— Hearing accounts

Estate of Jane Scoble Crase deceased—Petition for discharge of administrator

In re Mohegan Gold Mining Co—Petition for appoinment of trustees

Estate Lydia M Smith, deceased Petition letters administration

Estate Archibald Nivens, deceased—Petition for partial distribution

Butler vs Gilmore — Further hearing of evidence

In re Bear Gold Mining Co.—Petition for appointment of trustees

Estate of James P and Mary Ann Buckett, deceased—Final acounts and petitions for distribution

Estate Jacob S. Kohler, deceased—Petition for partial distribution.

Estate Henry L L. Knight, deceased—Petition to revoke probate of will.

Estate of Wm. J. Coombs, deceased—Final account and petition for distribution

Estate Hugh McCabe, deceased—Petition for letters of administration

Estate Leonita Hosking, deceased—Petition for letters administration.

Estate LouisParnum, deceased—Petition for letters administration.

Estate Henry Page, deceased—Petition for confirmation of sale of real estate.

Homestead of John Thetheway, deceased—Petition to have same terminated.

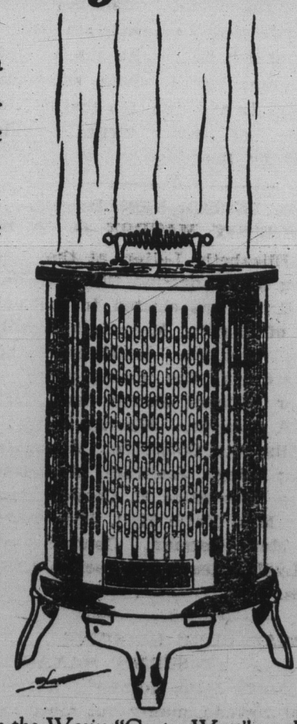
—only $12.50

Chilly or cold? Here's a practical electric heater. It heats and circulates the air in any small room.

This heater is called the Wesix "Cent-a-Watt." It is designed especially for the small bedroom, bathroom or breakfast nook.

Mothers use this Wesix "Cent-a-Watt" in the baby's room to keep the temperature warm all night. It is absolutely safe and healthful.



The "Cent-a-Watt" is beautifully finished in aluminum. It is light in weight and can be easily carried into any cold room. Equipped with six feet of cord. Plugs into any Convenience Outlet. Height 16½ inches.

The "Cent-a-Watt" supplies clean warmth for an average cost of a few cents an hour.

Telephone and we'll send you one. Just ask for the Wesix "Cent-a-Watt." $12.50 cash or terms.

You can also see the Wesix "Cent-a-Watt" at the dealers' stores.

BANK NOTES OF SWEDEN DEFY THE COUNTERFEITER

Swedish bank notes offer practically insurmountable difficulties to counterfeiters, because of a secret process used in the manufacture of the bank note paper, at the ancient paper mill of Tumba. The Swedish riksbank, which has been in existence more than 260 years, and is the oldest institution of its kind in the world, in 1755 purchased the Tumba paper mill for the manufacture of its bank note paper.

Since then this paper has been manufactured there by workmen who have passed along the secret of its manufacture from generation to generation. They utilize a number of processes which is guarded by the most absolute secrecy, are used in its manfacture and the bank notes are very carefully printed to guard the possibility of forgery. Through certain chemical ingredients in the bank note paper it can, even if destroyed by fire, be easily identified from the ashes.

MT. LASSEN ACTIVE

On Wednesday of last week, the people of Redding and adjacent country were made aware of the the fact that old Mount Lassen, who has been counted with the dead, lo, these many generations, has been only shamming, and is very much alive and giving the people of this generation due notice of that fact.

Evidently he had been dreaming that some one had called him an extinct volcano and became angry; rolled over in his sleep and gave a mighty shudder that served notice on the people of Redding and surrounding country that he was not dead, only sleeping.

The result was a series of quivvers that shook up not only Redding but the entire upper end of the Sacramento valley. The uneasiness of the mountain was communicated to the surrounding country for a distance of some fifty miles around and resulted in a series of four earthshocks that kept the people of Redding awake and in the yards and streets for most of the night. The tremors started at 2:30 a. m. and the height of the shock was reached at about 11.40 that forenoon. Just at this time a trial was in progress in the Redding court house and as the building commenced to quiver and shake as if it had the ague, Judge Walter Herzinger hastily adjourned court as he fled aiong with all others to the safety of the open street. All of which goes to prove that earthquakes are entirely lacking in dignity and are no respector of persons.

The last quake attained its greatest social success at the high school, where classes were hastily dismissed when plastering began to fall from the walls, and faculty as well as students hastily adjourned to the open. However, no material damage was done and the whole thing was more a matter of interest than otherwise.

Now, if Redding would just be generous and let the rest of the world know when she is going to have these quakes, there wouldn't be staning room enough in town to hold the thrill seekers that would rush in for the experience of having been in a quake. In fact, we would have been right in the vanguard of the rush.

CALIFORNIA'S MINERAL INDUSTRIES REVIEWED

(State Dept., of Mines.)

Compliation of the final returns from the mineral producers of the state of California for 1929, by the statisetical section of the Division of Mines and Mining under the direction of Walter W. Bradley state mineralogist, shows the total value of the year to have been $432,248,228, being an increase of $99,533,995 over the 1928 total of $332,714,283.

There were 54 different mineral substances, exclusive of a segregation of the various stones grouped under the heading of gems; and all but one of the fifty-eight counties of the state contributed to this list.

As revealed by the data following, the salient features of 1929 compared with 1928 were: A large increase in the amount and total value of the petroleum output; material advance in the consumption of natural gas; copper, mineral water, diatomaceous earth, granite, quick-silver, salt and soda. This taken into consideration with the greater activity in gold silver and lead mining; the activity shown in the opening up of old abandoned properties and increased development makes a decided showing for the better. Decreases were registered by cement, borax, pottery clay, Etc.

Petroleum showed an increase in value of $91,386,183. There was an increase from 231,811,465 barrels to 292,534,221 barrels, this being the largest annual production of crude oil in the history of the state.

The building of pipe lines increased the demand for natural gas and the output increased from 260,887,116 M. cubic feet, worth $22,260,947 to 400,192,201 M. vubic feet worth $29,067546.

The metals, copper increased from 25,162,304 pounds valued at $3,623,360 to 33,809,258 pounds worth $5,941,709 and quicksilver from a little over seven thousand flasks worth $844,649 to over ten thousand with a value of $1,195,705. The Output of gold decreased slightly from $10,875,315 to $8,526,703. Lead decreased from1,882,795 pounds, worth $109,102 to 1,428,777 pounds worth $90,014 and silver from 1,478,771 fine ounces, worth $865,081 to 1, 176.85 ounces, worth $627,285.

The increase in copper was due to higher prices paid for that metal over the preceding year, but this did not hold true with lead, silver and zinc, as their prices were higher, but not enough to justify the reopening of mines that were shut down in 1928.

The structural materials, such as granite, increased from a total value of $763,996 to $1,169,271 and miscellaneous stone from $17,332,100 to $17,840,159 while cement decreased from 13,625,231 barrels, worth $24,463,287 to 12,794,729 barrels worth $21, 038,565, and this group as a whole was the only one to show a decrease.

TELEPHONE WARN MEN OUT OF BURNING SHAFT

When fire broke out recently in the Ellison shaft of the Homestake mine in South Dakota considered to be the largest gold mine in the world the shift boss called each level in the mine by telephone, ordered each boss to call the role of his men and to rush them out of them ine at once.

The Homestake mine has a complete telephone system underground. These telephones are connected to the company's switchboard in the office. That ewitchboard is connected in turn to the nearest switchboard central office.

Officials of the company intimated that the use of the telephone probably averted what othterwise would probably have been a disaster. As it was, only two men were killed and they were trapped in an elevator when the steel cable burned in two and the cage dropped several hundred feet. The damage to the mining plant amounted to half a million dollars.

Memories of Shelley in Small Italian Town

On July 8, 1822, the poet Shelley and his friend, Lieutenant Williams, were drowned when their little schooner foundered off Viareggio, Italy, on a voyage from Leghorn to Spezia. Their bodies, washed ashore on the beach were there cremated in the presence of Trelawney, Leigh Hunt, and Byron. There is a monument to Shelley by an Italian, Urbano Lucchesi, in the Piazza Shelley on the western side of the town.

The boat in which Shelley went to his doom was built after designs made by his friend, Lieutenant Williams, a British naval officer. It was called the Don Juan. Shelley and his wife lived in a bare dwelling on the Gulf of Spezia, known as the Casa Magni. It was there he was en route from Leghorn with Lieutenant Williams and a sailor boy, when the storm in which all three perished overtook them. Capt. Edward Trelawney, a seaman friend of Shelley's, tracked down the bodies of Shelley and Wililams, and undertook the burning of them on the shore near Viareggio on August 15. The poet's ashes were then collected and buried in the new Protestant cemetery at Rome.

Wooden Cannon Used by Japs Against Russians

In the summer of 1865, relates the Trans-Pacific Review, when a few British warships hove in sight in the waters near Kyushu, the samurai of Satsuma, seeing the ships were out of gunshot from the shore, put out to the sea with several cannon. Arriving within range, they fired, but the shot failed to reach the ship. They were a little confused and fired at random but none struck. The English sailors, looking from their ship, laughed heartily at them. Suddenly a thundering boom of cannon was heard from the British ships and in a few moments the Japanese ship was seen no more except her cannon, which were floating in the water. Those floating cannon astonished the English sailors. They were made of wood hooped with bamboo. In the Russo-Japanese war the wooden cannon were again used to blow off the enemy's wire entanglements.

Saved "Bonny Prince"

Flora MacDonald was a Scottish woman of the MacDonald clan, born 1720, died 1790. Like others of her clan, she was a supporter of Prince Charles. After the battle of Culloden, 1746, in which the Scottish troops were defeated, Charles was obliged to flee and took refuge at Benbecula, where Flora lived. She disguised the prince as a maid servant to herself, and traveled on horseback and passed through many dangers, finally reaching the island of Skye in safety, from which the prince made his escape. Flora was tried and imprisoned for assisting him in his escape, but was finally released in 1747. In 1750 she married Allen MacDonald, a kinsman, and came to America, 1774. She died in 1790, and the Flora MacDonald college was organized as a memorial in 1896.

A BILLION DOLLAR CONSOLIDATION

Dedicated to the Prosperity of ALL California . . . . . .

Bank of America National Trust and Savings Association, the consolidated Bank of Italy and Bank of America of California, is dedicated to the continued growth and prosperity of *all* California. ▸ Built by the accumulated wealth of Californians–managed by Californians–founded on the faith of California depositors, Bank of America is ever conscious of the fact that no institution can be more prosperous than the community which it serves. One of the Nation's largest banks, it accepts the responsibilities that must go with recognized financial leadership. The progressive, empire-building spirit, together with sound banking practices, represented in both institutions, have joined forces to carry a *greater* institution on to *greater* records of achievement.

In Memory of Mary Puller
(Contributed)

I Cannot say and I will not say
That she is dead; she is just away
With a cheery smile and a wave of the hand
She has wandered into an unknown land.

And left us dreaming,
How very fair it needs must be;
Since she lingers there.
And, you, Oh, you!
Who the wildest yearn
For the old time step
And the glad return;

I think of her faring on as dear,
In the love of there, as the love of here.

A FRIEND

Samson's "Jawbone"

By his statement that Samson's jawbone of an ass was really a reaping hook under a poetical name, S. R. K. Glanville, of the British museum, has aroused one more discussion about the exactness of Bible stories. In a recent lecture Glanville said that the ancient Egyptian sickle was probably the jawbone of an animal, which accounted for the Samson story. He declared that Egyptian agriculture has preserved most of its ancient systems, and are using today some which were mentioned in the Bible. He added that the produce of a pharaoh's land had to be carefully checked against pilfering.—Boston Herald.

The Dance in History

The origin of dancing may be traced to a universal desire of expressing emotion by action. As far into antiquity as history reaches, every dance, whether belonging to civilized or savage nations, was accompanied by music or by ryhthmic beats of drums, shells, rattlers, sticks or by clapping the hands. Records show in a general way that in the very earliest times people danced and sang at the same time; afterward some danced while others sang an accompaniment, and finally musical instruments took the place of voice accompaniment.

Testing Pencil Leads

Wearing qualities of different types of lead for use in pencils are tested by an apparatus somewhat resembling a phonograph, says Popular Mechanics Magazine. An electrically driven turntable, covered with drawing paper, contains a center disk which revolves with the turntable. This disk is connected to two other similar disks, at the rim of the turntable, by a spring belt, thus driving these disks. One of them has four metal tubes in which the leads are inserted.

FRENCH CORRAL

FRENCH CORRAL Nov. 11.—(Special to the Nugget.)—We imagine the generous downpour of Saturday night has placed all in a happy mood. The delightful days that have followed, bespeaks our wonderful climate.

The grass—(Blessed grass)—ever responding quickly to the least kindness is again beautifying the hillside, fields and roadside and affording feed for the hungry animals. Oh, who would ever want to live elsewhere than in our own Nevada county;

Election day passed very quietly and orderly as it always does. A. Browning, J. Swazey, W. P. Clerkin and Miss Millie Clerkin were among those who came home to vote.

Miss Louise Moulton made the trip from Washington, where she teaches school to be home so she could cast her ballot on election day.

Chas. Buhl of Browns Valley had business here last week.

The fire demon has again been at work and only old landmarks seem to satisfy his appetite. The home of W. P. Clerkins, near this place was his last ravage and now only a pile of ashes remain of what was known as the "Allison Ranch House" in the 50's and later the "Skehan Place," and "The Jackitt Place". The property is now owned by W. P. Clerkin and his sister Millie and they make it their winter home. Miss Clerkin was home alone when the fire took place and had just had her dinner, which shows that the fire must have caught from a spark smouldering on the roof. The building was a large two story one and would carry a heavy draft of air and before help could arrive it was past saving. All out buildings near the home were burned and the men had to use their best efforts to save the large barn which was full of hay.

The many friends of the Clerkins family were glad to learn later that they carried some insurance on the property which will help in rebuilding.

The home of H. Barron of this place had a close call last week. Only quick work and ready help saved the day soon after Mrs. Barron discovered that the roof was on fire saved another old landmark. This house was known in the earlier days as the "Dave Norry place."

Mrs. A. Browning and family made a trip to Nevada City Thursday.

The pupils of the French Corral school gave another whist party Saturday night but owing to the rain, there was but a small attendance. Four tables were played. Miss Irene Browning was winner of the ladies' first prize and Eugene Shipley carried off the honors for the men. Mrs J. Kirkwood and J. W. Culver received the consolation prizes. Delicious refreshments were served and all had a happy time.

W. E. Moulton made a business trip to Marysville Saturday.

Misses Lucy and Theresa O'Connor visited their cousin Mrs. Wm. Hustler of Columbia Hill, Sunday.

Mr. and Mrs. John Hammond of Grass Valley were visitors at the O'Conner home in Birchville Sunday. Mrs. M. Bremer and daughters Alice and Ethel of Sacramento were also visitors.

Mrs. V. Capps and children and her mother, Mrs. Greggs of Rough and Ready visted the O'Connor family Sunday.

Mr. F. Bean and Lloyd Haslett went to Browns Valley Wednesday.

Clyde Browning was down from the Mt. Alta mine Sunday.

Miss Louise Moulton spent the week's end with her parents in French Corral.

Lloyd Dudley of Nevada City visited friends in French Corral Sunday.

CAMPTONVILLE JOTS

CAMPTONVILLE, Nov. 8 S(pecial to The Nugget.)—The case of Myer and Lusk vs., San Francisco Daily News was dismissed in the Camptonville Justice Court on November 3rd, on motion of J. M. McMahon, attorney for the plaintiffs. The case involved a damage suit resulting from an automobile accident near here on the day of the total eclipse last April when a newspaper car carrying a reporter for the News and a scientist crashed head on into a truck owned by Meyer and Lusk. The defendants settled the claim out of court which brought about the dismissal.

The Camptonville branch of the Marysville Union High School is now the proud owner of a fine, new upright piano, recently donated to the branch by the mother school .The gift was inspired by the fine work produced by students of the local school along with their desire for an instrument so that they could have music occasionally.

Fred B. Hanson, local road master, motored to Bangor Sunday to visit his wife who is detained there taking care of her mother who is ill.

Mr. and Mrs. William B. Meek spent Sunday visiting the Joubert family at Oak Valley.

ABerner. superintendent of the Garden Valley dredge arrived Sunday, called back by the machinery breaking down.

Mr. and Mrs. William Labadie and Miss Virginia Lenderman of Browns Valley were in town Saturday. Miss Lola M. Labadie who has been visiting returned with them.

Joe Caesini of San Francisco arrived Saturday to spend the week end visiting at his old home.

Mr. and Mrs. Bud Ennis passed through town Friday enroute to the upper country.

E. E. Barnum, assistant Forest Supervisor of the Tahoe National Forest at Nevada City was in town Friday on official business. His wife accompanied him.

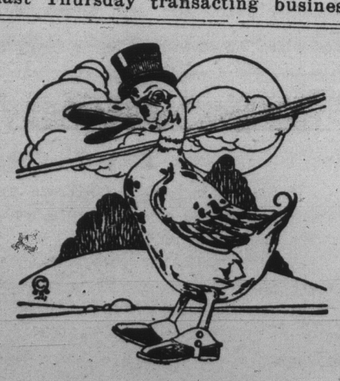
Julius E. Pauley motored to Marysville Friday, returning late that night with his sons, Earle and Myron, The three of them returned to the Hub City Sunday afternoon.

Forest Ranger Robert Hughes, foreman of the Forest Service road crew motored ti Nevada City Saturday on a short business visit.

The big storm Saturday ended the fire season of the local Forest Service headquarters. It was thought that the season was ended several weeks ago, during a storm period but conditions changed and the danger from fire was such that the entire force was put back on the job. The storm Saturday wet the forests down good, and with the cold nights there is little danger now and the summer force consisting of Dispatcher Dehrens and Guards Hamilton and Chatfield will be discontinued.

The Garden Valley dredger had the misfortune of practically breaking in half last Friday, when some of the large timbers in the center of the boat gave way. The boat had just started to operate after having been shut down for the past week undergoing repairs and was considered in very good condition. The owners of the enterprise came right up and arrangements were made to repair the boat at once and continue operations.

Supervisor W. J. Mellon and Joe Vierra, of Challenge, were in town last Thursday transacting business.



DON'T DUCK.

Meet your friends with neatly cleaned clothes.

Did you ever see an old friend coming down the street in the distance, and realizing that your clothes were not neatly cleaned and pressed, turned a corner to keep from meeting him?

Our cleaning prices are so moderate that such a thing need never happen. Send your clothes often to the

MRS. MOBLEY HOSTESS TO ST. AGNES GUILD GROUP

Mrs. W. L. Mobley was hostess last Wednesday at a delightful meeting of St. Agnes Guild. The Guild has been meeting at her home for several weeks past, and Wednesday being the social meeting for the month several interesting features were planned by the hostess, who is the president of the Guild. About a dozen were present, and following the regular meeting refreshments were served at one large table, which had an attractive centerpiece of autumn flowers.

The next meeting of the Guild will be held at the home of Mrs. Antha Locklin on Pine Street.

A FEW decades ago, telephone usefulness was measured by the number of telephones in the subscriber's exchange.

It was a big step forward when these exchanges were linked up, making voice-communication possible from city to city.

Today, the telephone user can call up London, Paris, Berlin — twenty-seven foreign countries in fact, as well as 20 million connected telephones in this land.

Yet, vast as it is, this telephone service is personal to *you*. Each telephone call is a transaction by itself and each customer is an individual.

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY

KENNEDY ROYAL MODEL 726

This beautiful model is significent of everything symbolized by "The Royalty of Radio," It upholds every KENNEDY tradition. Its exquisitely grained butt walnut side panels and hand carved quarter French doors reflect an elegence that is obtained only by combining the finest veneers and craftmanship with a design of distinction. Every true lover of fine furniture will recognize this model as a masterpiece—the most beautiful radio in America.
